TEACHING METHODOLOGY

LEARNING OBJECTIVES OF THE SUBJECT
The objective of the workshop is, through the realization of a business plan, to see the entire value chain of a company in the field of the building sector, e.g. manufacture of ceramic tiles, construction company or structural calculation office, from the creation of the business idea to its implementation.
The specific objectives are:
1) Identify each one of the essential parts of a business plan: idea, market study, operations plan and financial plan.
2) Value the importance of teamwork and provoke synergies.
3) Visualize the chain of activities that exists in a construction company.

Product definition

Description:
In this module we will develop in the most detailed way possible the product / service created and validated by the marketing study.
In each course, a different product or service will be proposed from the previous one, as an object of the business plan. In this way, different businesses with different casuistry and procedures may be proposed, giving rise to rotating participations according to the specialties of the teaching staff of the technology department.

As an example:

• Construction materials: ceramic pieces, wood processes, binders, artificial stones, testing laboratories, etc ...
• Construction company, prefabricated panel assembly company, facilities, etc ...
• Technical consultancies for calculations of structures, facilities, Project management, facilities management, etc.
