

## Course guide

# 310760 - 310760 - Change of Use of Buildings

Last modified: 13/01/2024

**Unit in charge:** Barcelona School of Building Construction

**Teaching unit:** 752 - RA - Departamento de Representación Arquitectónica.

**Degree:** BACHELOR'S DEGREE IN ARCHITECTURAL TECHNOLOGY AND BUILDING CONSTRUCTION (Syllabus 2019).  
(Optional subject).

**Academic year:** 2023    **ECTS Credits:** 3.0    **Languages:** English

## LECTURER

**Coordinating lecturer:** Dídac Gordillo Bel

**Others:** Dídac Gordillo Bel

## PRIOR SKILLS

Ability for the drawing and graphical representation and knowledge in architecture and construction for the development of projects.

## REQUIREMENTS

Core subjects of graphical expression.

Define the architectural styles of any inherited building.

Identify the periods of each architectural style.

## DEGREE COMPETENCES TO WHICH THE SUBJECT CONTRIBUTES

### Specific:

FB-03. FB-3 Ability to apply the systems of spatial representation, the development of the sketch, the proportionality, the language and the techniques of the graphical representation of the constructive elements and processes.

FE-01. FE-1 Ability to understand and make the graphical documentation of a project, to do data gathering, surveying of plans and geometric control of construction units.

FE-01. FE-1 Ability to understand and make the graphical documentation of a project, to do data gathering, surveying of plans and geometric control of construction units.

FE-04. FE-4 Knowledge of the materials and traditional or prefabricated construction systems used in construction, their varieties and physical and mechanical features which define them.

FE-04. FE-4 Knowledge of the materials and traditional or prefabricated construction systems used in construction, their varieties and physical and mechanical features which define them.

FE-06. FE-6 Knowledge of the historical evolution of the constructive techniques and elements and the structural systems which have led to stylistic forms.

FE-06. FE-6 Knowledge of the historical evolution of the constructive techniques and elements and the structural systems which have led to stylistic forms.

FE-10. FE-10 Aptitude to intervene in the refurbishment of buildings and the restoration and preservation of the built heritage.

FE-10. FE-10 Aptitude to intervene in the refurbishment of buildings and the restoration and preservation of the built heritage.

### Transversal:

04 COE N3. EFFICIENT ORAL AND WRITTEN COMMUNICATION - Level 3. Communicating clearly and efficiently in oral and written presentations. Adapting to audiences and communication aims by using suitable strategies and means.

02 SCS N3. SUSTAINABILITY AND SOCIAL COMMITMENT - Level 3. Taking social, economic and environmental factors into account in the application of solutions. Undertaking projects that tie in with human development and sustainability.

02 SCS N3. SUSTAINABILITY AND SOCIAL COMMITMENT - Level 3. Taking social, economic and environmental factors into account in the application of solutions. Undertaking projects that tie in with human development and sustainability.

## TEACHING METHODOLOGY

The subject is developed in two parts: one theoretical parts where is proposed a tour through the most relevant manifestations of the last centuries about the initial historic and stylistic basis, continuing with the following interventions, until the current period of the architecture in all its field and with all its artistic wealth. And also a second part which is practical where there will be developed different space solutions.

Communication with the faculty in class and by email.

Presentation of the theoretical lectures at class.

Occasionally there will be programmed some architectural visit which the professor considers interesting.

## LEARNING OBJECTIVES OF THE SUBJECT

### STUDY LOAD

Type	Hours	Percentage
Hours large group	30,0	40.00
Self study	45,0	60.00

**Total learning time:** 75 h

### CONTENTS

#### - Treatise of the architecture by the styles and typologies

##### Description:

Theoretical Block. Treaty of the architectures through the styles and typologies.

1. The styles through the architects. Buildings with unkown author
2. Different periods through their buildings.
3. Elements of the architecture. Purpose, technique, space communication, housing, form and utility.
4. Ephemeral architecture.
5. Restoration of spaces.
6. Furniture and architecture.

##### Specific objectives:

The objectives consist in the ability of the student to express with graphical techniques, some intervention projects in determined spaces and its transformation, by models coming from the architecture.

##### Related activities:

Valuation of the attendance and cooperation at class.

Activities: Individual or in group works in continuous evaluation.

##### Full-or-part-time: 58h

Theory classes: 8h

Practical classes: 8h

Guided activities: 14h

Self study : 28h

### - Transformation of the architectural spaces according to the original typology

#### Description:

Theoretical block. different architectural typologies.

1. Educational architecture.
2. Religious architecture.
3. Industrial heritage
4. Industrial colonies
5. Funerary architecture
6. Heritage and defensive architecture- Transformation of architectural spaces according to the original typology

#### Specific objectives:

In this content the students work:

Transformation of the spaces. The adaptation process to the destined use. Through several projects: Lofts, apartments, unique dwellings, industrial units, recycling: dwellings and offices, small buildings.

Expression, representation and forms of the materials through the graphic art.

#### Related activities:

Valuation of the attendance and cooperation at class.

Activities: Individual or in group works, continuous evaluation.

ADAPTATION OF ARCHITECTURAL SPACES IN UNIQUE BUILDINGS.

The most important activity is to guide the student through the fulfilment of a project similar to the PFG which will be presented for the obtaining of the degree.

#### Full-or-part-time: 58h

Theory classes: 8h

Practical classes: 8h

Guided activities: 14h

Self study : 28h

## GRADING SYSTEM

Each day of class there will be done an oral exposition about the corresponding topic and there will be developed a graphical exercise at class following the professor guidelines.

There will be proposed and corrected a special homework at half course, and there will be delivered a final project with a valuation for everyone of 50% of the final mark .

The attendance to class and the active involvement of the students are valued.

## EXAMINATION RULES.

To achieve the final mark, the professor must have corrected personally the works of the student at class. There won't be accepted any work which has not been supervised by the professor.

The drawing and presentation techniques are totally free with the exception of the paper format which will be in DIN A3 format.

THE FINAL PART OF THE SUBJECT WILL BE DEVELOPED BY MEANS OF A WORK SIMILAR TO THE PFG DIRECTED TO THE FULLFILMENT OF THE SAME.
